

## FHGen101/6/8/15

- PMG ( Permanent Magnet Generator) - 3 phase output
- NdFeB magnets
- Voltage curve 15V/1000RPM ( Custom winding possibility )
- Diameter - 101mm
- Thickness - 14mm ( with out connecting wires + 3mm)
- Weight - stator with 50 cm wires 240g, magnetic rotor 90g
- Power at 3000RPM – 300W
- Out. Power at 6000RPM – 600W
- Cooling – forced by air flow
- Resistance to fuel, oil, water , mechanical stress
- Operating temperature -40°C to 120°C
- Winding insulation 200°C
